(NYSE:BSX)

Natick, Mass., Feb. 28 [/PRNewswire-FirstCall/](#) -- Boston Scientific Corporation (NYSE: BSX) announced today the launch of its Neuromodulation Group's Race Against Pain public outreach campaign to 50 million chronic pain sufferers in the United States. Inspired by Mike Roman - Formula race car driver, chronic pain patient and campaign spokesperson - the Race Against Pain campaign's mission is to educate sufferers about the importance of Pain Specialists and provide them with peer-to-peer support through <http://www.raceagainstpain.com/>. Boston Scientific will raise awareness through various mediums including media, Internet, industry conference speaking engagements, race events in 11 markets, health care professional events and patient outreach.

"Chronic pain costs society more than \$100 billion annually and is the leading cause of adult disability in the U.S.," said Michael Onuscheck, President of Boston Scientific's Pain Management Business. "While all physicians treat pain, few specialize in pain management. The Race Against Pain campaign will help raise awareness for the under-recognized medical discipline of pain management and help guide chronic pain sufferers to possible solutions."

Roman, exhausted all pain treatment options, including powerful pain medications, drug pumps and single-source spinal cord stimulation (SCS) therapy. In 2005, he was successfully treated by a Pain Specialist with a new generation of SCS therapy, Boston Scientific's Precision™ multi-source spinal cord stimulation system. He has since eliminated pain medications from his daily regimen. Now dedicated to helping others who suffer from chronic pain, Roman works to shorten the amount of time it takes chronic pain sufferers to find a pain management solution.

"I endured more than 30 surgeries and four progressive amputations of my right leg in an attempt to manage my phantom limb pain," said Roman. "I lived in horrifying chronic pain for a decade before I finally found a medical professional who specialized in pain management. He provided me with options that other physicians didn't know about, and now I control my pain instead of it controlling me."

Boston Scientific is sponsoring Roman's race team and launching <http://www.raceagainstpain.com/> to bring the message of hope to the 50 million other Americans who suffer from the effects of chronic pain. For information on the campaign, visit <http://www.raceagainstpain.com/>. For information on Precision Spinal Cord Stimulation therapy used by Mike Roman, visit <http://www.controlyourpain.com/>.

Boston Scientific is a worldwide developer, manufacturer and marketer of medical devices whose products are used in a broad range of interventional medical specialties. For more information, please visit: <http://www.bostonscientific.com/>.
