

Boston Scientific Announces Preliminary Results Related to First Quarter Sales of Coronary Stent Systems

(April 5, 2004) -- Boston Scientific Corporation (NYSE: BSX) today announced preliminary results related to U.S. sales of its TAXUSTM Express^{2TM} paclitaxel-eluting coronary stent system and worldwide sales of coronary stent systems, for the first quarter of 2004. The Company received approval from the U.S. Food and Drug Administration on March 4th to market the TAXUS system in the United States, and it recorded its first sale on March 8th.

Preliminary net sales of its TAXUS system in the United States from March 8th through March 31st (18 selling days) were approximately \$98 million. At its February 23rd analyst meeting, the Company estimated TAXUS system sales of between \$54 million and \$75 million for the period of March 1st through March 31st (23 selling days). The Company shipped a total of approximately 133,000 units through March 31st; this represents both revenue and non-revenue units. The Company said that it was shipping to 864 accounts at the end of the quarter. There are approximately 1,200 cardiac catheterization laboratories in the United States.

Preliminary worldwide net sales of all coronary stent systems during the first quarter were approximately \$283 million, of which \$215 million were TAXUS systems. At the February 23rd meeting, the Company estimated first quarter worldwide coronary stent system sales of between \$210 million and \$240 million, of which TAXUS system sales were estimated to be between \$150 million and \$180 million.

"All aspects of our U.S. TAXUS launch continue to go very well, and we are pleased that we are exceeding expectations," said Jim Tobin, President and Chief Executive Officer of Boston Scientific. "Our execution remains outstanding, and our supply remains unconstrained. Above all, we are gratified to be able to bring this revolutionary technology to physicians and patients in the United States."
