Boston Scientific Receives LEED Certification for Marlborough, MA Campus **Environmentally focused improvements are hallmark of renovations to Endosurgery headquarters**

PRNewswire-FirstCall
NATICK, Mass.
(NYSE:BSX)

NATICK, Mass., May 29 /[PRNewswire-FirstCall](#)/ -- Boston Scientific Corporation (NYSE: BSX) today announced it has received Leadership in Energy and Environmental Design (LEED) certification from the U.S. Green Building Council for the renovation of its Endosurgery Headquarters located in Marlborough, MA. The 500,000 square foot campus houses the Company's Endosurgery Group, including its research and development laboratories as well as extensive office space for supporting business functions.

"We worked hard to provide a workplace that energizes people, while providing a benefit to the environment and our bottom line," said Steve Moreci, Senior Vice President and Group President, Endosurgery. "Receiving LEED certification is a welcome endorsement of our efforts to be an environmentally conscious corporate citizen."

Boston Scientific obtained LEED certification for the Marlborough renovation project by incorporating elements that provide significant environmental benefits, a higher-quality work environment, and lower operating expenses. Examples include installation of a heat-reflective insulated roof that reduces cooling requirements, a state-of-the-art ventilation system that precisely delivers heating and cooling where needed, and low-flow plumbing fixtures to decrease water usage. In addition, the Company used recycled building materials where possible, and arranged for more than 95 percent of the project's construction waste to be recycled, both of which minimized environmental impacts from demolition and renovation work.

To provide a high quality workplace, special construction materials and furniture were selected to limit the release of volatile organic compounds and hazardous chemicals in order to protect indoor air quality. Additionally, windows and side lights were installed throughout the facility to maximize the amount of natural light reaching interior offices and cubicles.

Recently, the Company received a Central Mass Green Award from the Worcester Business Journal to recognize the environmental efforts behind the Marlborough renovation project.

The Marlborough Endosurgery project is the second LEED award for Boston Scientific. Last year, the Company received LEED certification for its manufacturing facility in Maple Grove, MN.

Boston Scientific is a worldwide developer, manufacturer and marketer of medical devices whose products are used in a broad range of interventional medical specialties. For more information, please visit: <http://www.bostonscientific.com/>.

Cautionary Statement Regarding Forward-Looking Statements

This press release contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934. Forward-looking statements may be identified by words like "anticipate," "expect," "project," "believe," "plan," "estimate," "intend" and similar words. These forward-looking statements are based on our beliefs, assumptions and estimates using information available to us at the time and are not intended to be guarantees of future events or performance. These forward-looking statements include, among other things, statements regarding our capital needs, expenditures and our operational strategy. If our underlying assumptions turn out to be incorrect, or if certain risks or uncertainties materialize, actual results could vary materially from the expectations and projections expressed or implied by our forward-looking statements. These factors, in some cases, have affected and in the future (together with other factors) could affect our ability to implement our business strategy and may cause actual results to differ materially from those contemplated by the statements expressed in this press release. As a result, readers are cautioned not to place undue reliance on any of our forward-looking statements.

Factors that may cause such differences include, among other things: future economic, competitive, reimbursement and regulatory conditions; new product introductions; demographic trends; intellectual property; litigation; financial market conditions; and, future business decisions made by us and our competitors. All of these factors are difficult or impossible to predict accurately and many of them are beyond our control. For a further list and description of these and other important risks and uncertainties that may affect our future operations, see Part I, Item 1A- Risk Factors in our most recent Annual Report on Form 10-K filed with the Securities and Exchange Commission, which we may update in Part II, Item 1A - Risk Factors in Quarterly Reports on Form 10-Q we have filed or will file thereafter. We disclaim any intention or obligation to publicly

update or revise any forward- looking statements to reflect any change in our expectations or in events, conditions, or circumstances on which those expectations may be based, or that may affect the likelihood that actual results will differ from those contained in the forward-looking statements. This cautionary statement is applicable to all forward-looking statements contained in this document.
